# JANOME Model MC8900QCP Special Edition

The stunning new HORIZON Memory Craft 8900QCP Special Edition is the latest addition to our computerised long-arm range of machines. We've taken all the best and easiest to use features from all our other models, added even more and packed them into one unbelievable sewing machine.

The sheer length of the arm space is impressive at 280mm (11")... ideal for large quilts, bridal dresses and those bigger craft and home furnishing projects. This machine has a great range of stitches and alphabets, 9mm stitch width, pattern elongation up to 5 times standard length and a built-in AcuFeed system for precise fabric handling. Plus there's an easy change needle plate to enhance straight stitch performance, a new easy set bobbin system, an automatic needle threader, an easy bobbin winder, a maximum speed controller and a start/stop button if you choose not to use the foot control. Now you start to realise how complete this machine is. It also has a needle up/down button which programmes the needle to either finish in the up position or in the fabric... great for pivoting on corners! And it has an

auto-lock stitch button to ensure every stitch pattern is locked off at the end, there's even an automatic thread cutter to trim your threads.

You can rest assured the MC8900QCP Special Edition can meet every sewing challenge with spectacular stitch quality at speeds up to 1,000 stitches per minute. It even has a memory to store stitch combinations, an adjustable knee lifter and a remote thread-cutter port.

It doesn't matter whether you are dressmaking, quilting, crafting or making home furnishings, with creativity this easy you'll just want to get started.
